Hazardous Waste

Fact:

Printing is a complex business.

Inks, coatings, plates, solvents, chemicals...

Many ingredients go into producing quality printed products.

Over the past year, our team at Fidelity Press has been striving to reduce our impact on the environment by reducing the amount of hazardous waste that we generate.

By purchasing new equipment and changing suppliers of many of these ingredients, we have exceeded our goal.

Effective March 2008, according to the guidelines set by the Florida Department of Environmental Protection, we now generate 0% hazardous waste.
